Art Deco Mumbai's latest Instagram post about their young students' imagination of Mumbai's art deco in zine will leave you curious. Described as refreshing by Art Deco Mumbai founder Atul Kumar, the artworks are final submissions by students of the Academy of Architecture, Mumbai, after a five-day stint of observing structures in the city. "It is almost as if we are being queried as to what we have done with the planet and specifically, with the urban form," Kumar explained. He further noted, "I love how they set the whole thing in a sunburst and captured rising sea levels as well. It is gratifying that this generation is concerned about the future," he said.
